

Our client is one of the world's largest pharmaceutical companies and is known for its continuous investment in product development and in people. Based at the company's headquarters in Basel, Switzerland they are now seeking a

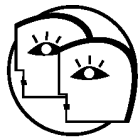

# Change Management Specialist

As change management specialist, you develop, and deliver training programs which foster team work and change. You will set up and facilitate seminars to work on specific challenges and support the communication and implementation of improvement initiatives throughout the division <Pharma Development>.

The position requires excellent oral and presentation skills, and ideally a minimum of three years training experience. Candidates should have skills in facilitation, be reliable, flexible and discrete, with a flair for working cross-functionally and cross-culturally. Fluency in English is a must. German proficiency an additional benefit. Ideal candidates should have familiarity with the drug development process and a relevant university degree.
